

ICARO

# HYBRID RISER

# HYBRID RISER

With our new hybrid risers it is possible to use the good starting properties and the high stability and compactness of the PICA not only for the normal foot- and winch start but also for paramotoring. Due to the integrated trimmer the torque of the motor can be balanced and additionally the flight speed can be varied. For the flight without motor also the usage of the speed system is possible.

## THE HIGHLIGHTS

- 1 UPPER AND LOWER HANG POINT
- 2 BRAKE ROLLER HEIGHT ADJUSTMENT
- 3 TRIMMER
- 4 SPEED SYSTEM
